Instructions

To email the documents, click on the Email Documents link. All of the documents in the Documents Cart will be sent as separate attachments on separate emails - one attachment per email. This will avoid problems with email accounts where the number of attachments per email are restricted as well with other email accounts that restrict the total size of attachments per email.

For printing, the documents will have to be selected individually. You will not be able to print all of the documents in the Documents Cart at the same time. To print a document, first click on a document link in the Print Document Column. Once a printable version of the document is displayed, click on your printer icon or use your browser's menu functions for printing. To return to the Documents Cart, click on the Listing Number link or on the MLS Report link (in the case of a one line or a one line plus comments report).

To remove a document from the Documents Cart, click on the document link in the Remove From Cart column.
